

Accede Energy's paperless field worker environment creates operational efficiencies, improves form completion and submission

Client:

- North American energy services provider

Solution:

- Lone Worker Monitoring
- Journey Management
- Real-Time Documentation
- Safety Ticket Management

Benefits:

- Reduced forms completion time and increased submission rates
- Reduced paperwork administration time and costs
- Understanding of where workers are and status of projects
- Ability to communicate real-time

The Challenge:

Accede Energy was spending a significant amount of administrative time dealing with paperwork. Field Workers found it difficult to locate and physically manage the multiple forms submission including hazard IDs and GSAs they needed to carry at any time and the process to get them back into the hands of head office was inefficient. When they were delivered, they were often late and incomplete forcing staff to hunt down the missing information. Additionally, Accede did not have a clear understanding of where field workers were at any given time and could not readily communicate with them.

Field Safe's Solution:

Accede engaged Field Safe to conduct a review of their processes including existing forms. They licensed Lone Worker Monitoring, Real-Time Documentation, Journey Management and Safety Ticket Management applications.

Results and ROI:

Users love it. Accede has realized paperwork administration time savings of app. 85% allowing managers to focus on other projects. Ease of use was cited by many admittedly non-tech savvy workers and is the key reason for the improvements in form completion and submission. The ability to quickly access knowledge documents (like safety manuals) as a need arises is an additional benefit.

Next Steps:

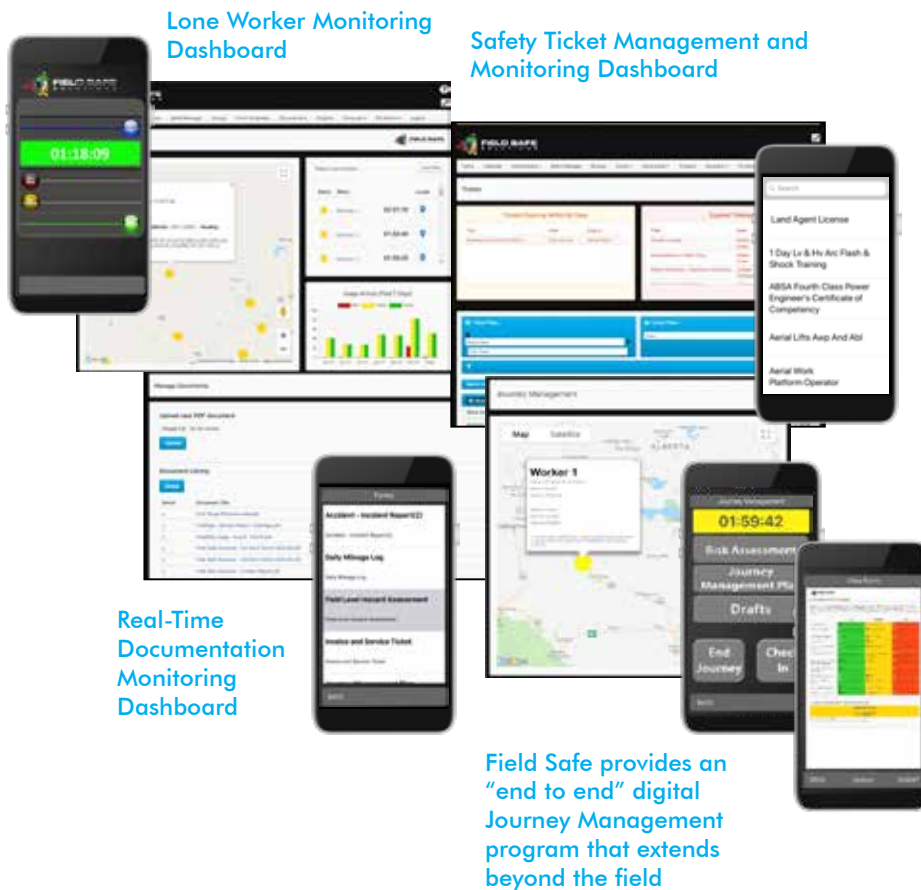

Digitizing field data collection has resulted in more information being shared. As a trusted advisor, Field Safe is working closely with Accede to help them analyze and leverage that data to drive continuous improvement of their safety programs as well as other operational efficiencies.

“Before Field Safe I spent approximately 85% of my time dealing with paperwork, making sure it was filed and it was all there. On a scale of 1-10 of being tech savvy I would place myself at 2 before Field Safe. Field Safe is very easy to maneuver around and get what you are looking for. Whether, there would be forms, creating your own forms, tracking employees. It's all easy, and right there, it's just push and learn.”

June Allport, Health & Safety Manager

Easy form completion and submission. Reduced administration. Improved communication. Paperless environment.

Field Safe provides an "end to end" digital Journey Management program that extends beyond the field

"The best thing for us about Field Safe is how easy it makes it for us to track individuals all over Alberta. When they leave site, they can switch to yellow and when they come back here, they can switch back to green when they clean trucks. We know exactly where they are all the time. And we know when they are done for the day and on their way home."

Mike Meyer, Operations Manager

About Us

Field Safe Solutions is a cloud-based software as a service company based in Calgary, Alberta. Our easy-to-use applications digitize the field, giving our clients real-time data and the peace of mind that their employees are accounted for at any time, anywhere in the world.
