

## Corrective Actions Register

EASY-TO-USE. SAFETY FOCUSED. ALL-IN-ONE.

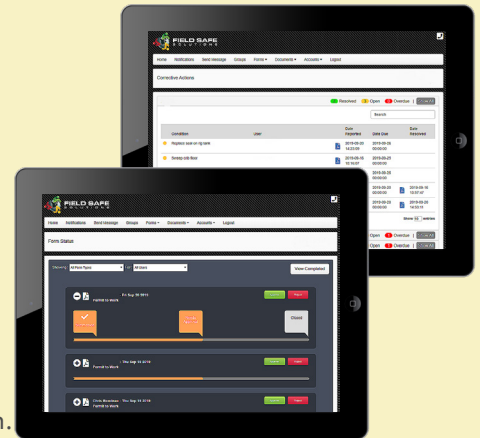

### Ensure Identified Deficiencies Are Quickly Actioned and Resolved.

When performing tasks, completing inspections or investigating hazards, unsafe or unsatisfactory conditions are often discovered. Action plans to resolve the issue and mitigate the threat must be put in place to ensure deficiencies are resolved. If your processes are still manual, corrective actions may be delayed or forgotten entirely.

Field Safe's Corrective Actions Register ensures that identified deficiencies don't fall through the cracks. We do this by automating the instant creation of action plans and simplifying the process of managing the completion of tasks required to fulfill them.

### Corrective Actions Register Ensures No Deficiency Goes Unresolved.

- Customized and automated notifications of non-compliance, unsatisfactory, or unsafe conditions are logged easily from any mobile device.
- Prescribed workflows create corrective action tasks, assigning, and tracking their status from identification through to completion.
- Workers assigned tasks receive notifications and can view each task, provide updates, and close tasks (including written and photo evidence of progress and completion) from their smartphone or tablet.
- All required forms are attached to each corrective action, saving on time spent identifying and locating those required.
- Dashboards provide managers a real-time view of all corrective action plans and their status.

### Key Benefits of Corrective Actions Register:

- **Ease of Use.** Like all of our solutions, Corrective Actions Register is easy to use, ensuring that deficiencies are quickly and effectively resolved.
- **Reduce Risks and Prevent Incidents.** Fast resolution of hazards and deficiencies protects your workers from existing threats and mitigates future occurrences.
- **Operational Efficiencies.** Digitizing all compliance obligation steps saves time and reduces errors inherent in manual processes. Of particular benefit, all forms required to complete each action are immediately provided eliminating the need for the task owner to identify and then locate them.
- **Real-Time Communication and Information Sharing.** Notification of required actions is delivered instantly and overdue reminders pushed out as deadlines pass. Real-time communication allows you to update and share notifications and reminders instantly.

**"Our system is so easy to use, we ship without a manual!"**

Cam Barrett, CEO of  
Field Safe Solutions

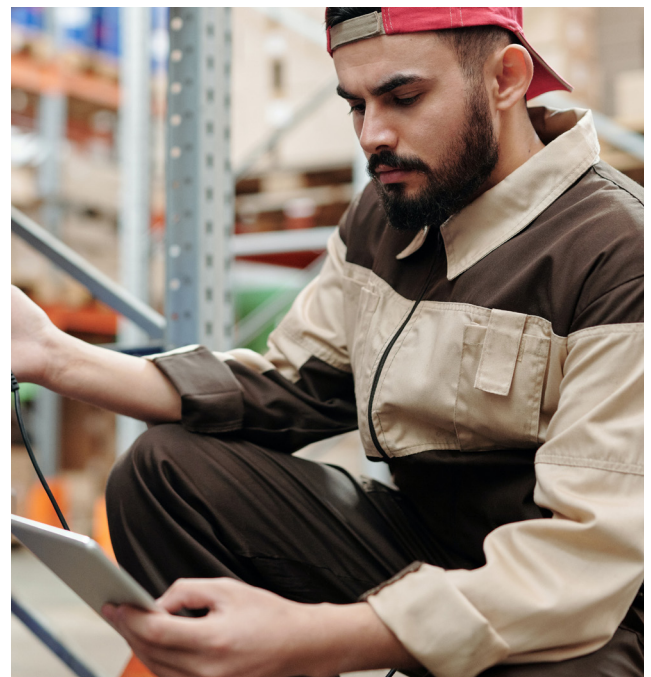

### Corrective Actions Register ensures that identified deficiencies are logged, actioned, and tracked through to resolution.

Field Safe helps you construct a complete, all in one, health and safety system that facilitates real-time communication with workers, monitors journey management, tracks tickets and tasks, digitizes forms completion and data capture, ensures regulatory compliance and improves corporate decision making. However, our solutions are also modular, with each capable of operating on its own. License only what you require now and add additional functionality as your safety culture and business needs dictate.

Field Safe integrates into any software platform and runs on Apple, Android and Windows operating systems from any smartphone or tablet. In the most remote areas and extreme environments we keep workers connected by tapping into cellular services through satellite-enabled devices.

Our partnership with STARS and other North American emergency services providers initiates active monitoring of your team members. If a check-in is missed, pre-determined automated call responses are activated. Workers know that in the event of an incident, help will soon be on the way.

Field Safe has a number of solutions designed to keep workers connected and safe, while optimizing your operations and lowering costs. **Learn more by visiting our website or call us at 1-800-497-7614.**
