

## Journey Management

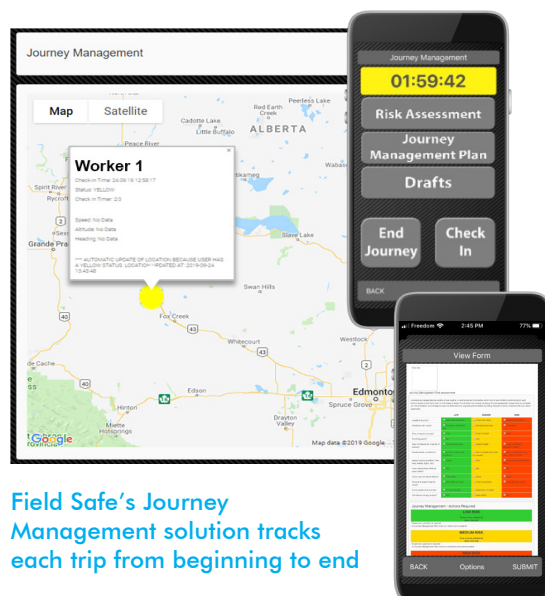

**EASY-TO-USE. SAFETY FOCUSED. ALL-IN-ONE**

### Field work is a journey, not just a destination.

One of the riskiest activities your field and remote workers can face is the trip to and from the site. The best safety applications recognize this and include a digital journey management component that is easy-to-use, keeps workers connected in real-time, identifies potential threats throughout the journey and provides a complete record of every trip.

Field Safe's Journey Management solution tracks the status of a trip from beginning to end. Risk is assessed (high, medium or low) before you start and recommendations on how best to proceed provided. Dashboards display journey status in real-time. Road condition updates and other notifications are immediately shared so that route optimization measures can be implemented if necessary. In the event of an incident, information is easily documented and shared between the vehicle occupants and head office. By connecting workers and supporting them throughout each trip, Field Safe's Journey Management solution helps you save time, save money and save lives.

- Digital check-in processes are enabled through any mobile device.
- Pre-trip, risk is assessed by answering a series of questions, with guidance provided based on that assessment on how best to proceed (if at all).
- Travel risks are identified ahead of time but also updated continuously to spot and avoid new threats.
- Information (including photos) is documented and communicated in real-time between the vehicle, the field, and head office.
- Strategies are identified and put into place to reduce incidents and optimize route planning.

Field Safe's Journey Management solution tracks each trip from beginning to end

### Key Benefits of Journey Management:

- **Ease of Use.** Because our solutions are so user friendly and operate on smartphones and other mobile devices, user adoption is high.
- **Operational Efficiencies.** Spot potential hazards or delays that increase travel time to avoid unnecessary costs.
- **Real-Time Communication.** Know where your people are and communicate with them any time, anywhere in the world. Share up-to-date project status with stakeholders and clients.
- **Reduce Risks and Prevent Incidents.** Assess the risk level of a journey before you start (low, medium or high) to determine how best to proceed. Immediate awareness of changes in road or weather conditions allows you to quickly identify the safest and most cost-effective alternate path.
- **Emergency Services Integration.** Our partnership with STARS® and other emergency services providers initiates active monitoring of workers. If a check-in is missed, pre-determined responses are initiated.

## Best-in-class safety programs are digital and include the journey, not just the destination.

Field Safe helps you construct a complete, all in one, health and safety system that facilitates real-time communication with workers, monitors journey management, tracks tickets and tasks, digitizes forms completion and data capture, ensures regulatory compliance and improves corporate decision making. However, our solutions are also modular, with each capable of operating on its own. License only what you require now and add additional functionality as your safety culture and business needs dictate.

Field Safe integrates into any software platform and runs on Apple, Android and Windows operating systems from any smartphone or tablet. In the most remote areas and extreme environments we keep workers connected by tapping into cellular services through satellite-enabled devices.

Our partnership with STARS and other North American emergency services providers initiates active monitoring of your team members. If a check-in is missed, pre-determined automated call responses are activated. Workers know that in the event of an incident, help will soon be on the way.

Field Safe has a number of solutions designed to keep workers connected and safe, while optimizing your operations and lowering costs. **Learn more by visiting our website or call us at 1-800-497-7614.**

**"Peace of mind knowing your people are accounted for in real-time – anywhere in the world."**
