FIELD SAFE
SOLUTIONS

Mobile Notifications
### EASY—TO—USE. SAFETY FOCUSED. ALL—IN—ONE.

Next level safety program communication and collaboration.

Field Safe built our latest solution, Mobile Notifications, to make it easier for clients to notify team members about new safety requirements and remind them of upcoming deadlines.

Mobile Notifications facilitates the communication of supplemental information beyond that automatically created by other solutions like Compliance Calendar and Corrective Actions Register. We make it fast and easy for team members to action and complete tasks, and by doing so, improve your compliance rate. Reminders and notifications can "stand-alone" meaning they do not have to be tied to a logged task or activity. This simple but very important capability provides you an even higher degree of team communication.

Mobile Notifications adds a higher degree of team communication.

- Fully customizable to meet your unique needs.

- Real-time communication allows you to update and share reminders instantly.

- Reminders can be one off or scheduled to repeat at the frequency you dictate and sent via text message, email, or automated phone call.

- Like all Field Safe solutions, Mobile Notifications is easy to use which increases user uptake, compliance and submission rates.

Key Benefits of Mobile Notifications:

- **Ease of Use.** Because our solutions are so user friendly and operate on smartphones and other mobile devices, user adoption is high.

- **Immediate Information Sharing.** Real-time communication allows you to share updates and reminders instantly, including new pandemic protocols.

- **Fully Customizable.** Mobile Notifications is customizable to meet your company's specific requirements and timelines.

"Our system is so easy to use, we ship without a manual!"

Cam Barrett, CEO of
Field Safe Solutions

Mobile Notifications provides an even higher degree of team communication.

Field Safe helps you construct a complete, all in one, health and safety system that facilitates real-time communication with workers, monitors journey management, tracks tickets and tasks, digitizes forms completion and data capture, ensures regulatory compliance and improves corporate decision making. However, our solutions are also modular, with each capable of operating on its own. License only what you require now and add additional functionality as your safety culture and business needs dictate.

Field Safe integrates into any software platform and runs on Apple, Android and Windows operating systems from any smartphone or tablet. In the most remote areas and extreme environments we keep workers connected by tapping into cellular services through satellite-enabled devices.

Our partnership with STARS and other North American emergency services providers initiates active monitoring of your team members. If a check-in is missed, pre-determined automated call responses are activated. Workers know that in the event of an incident, help will soon be on the way.

Field Safe has a number of solutions designed to keep workers connected and safe, while optimizing your operations and lowering costs. **Learn more by visiting our website or call us at 1−800−497−7614.**

"The flexibility Mobile Notifications provides is very valuable. It takes real−time team communication and collaboration to an even higher level."

Ron Visser, Health and Safety
Subject Matter Expert of Field Safe Solutions
