

Real-Time Documentation

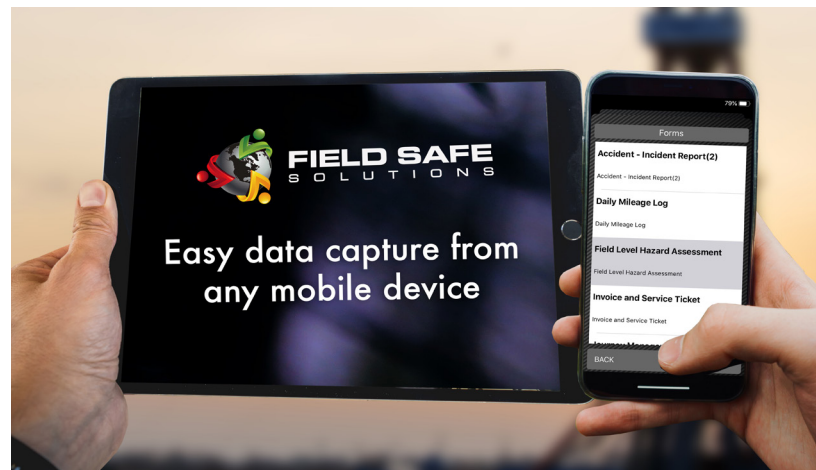

EASY-TO-USE. SAFETY FOCUSED. ALL-IN-ONE.

Ease of use drives user adoption, and faster forms completion and submission.

Field Safe resolves one of the biggest challenges organizations face: the real-time exchange of information between workers and head office. By enabling the digital transfer of data, Field Safe connects workers and creates smarter workflows that improve safety and corporate decision making while creating efficiencies that lower operating costs. Our industry leading ease-of-use drives user adoption, and faster completion and submission of paperwork.

Facilitate access to reference documents. Safety manuals, corporate policies and procedures, regulations, and other reference materials are automatically uploaded and kept current for access by team members on an “as needed” basis.

Digitize paper-based forms. Mobile devices collect field observance data, directing it into an intelligent workflow. Team members electronically receive, complete, edit and send paperwork, facilitating better reporting and accessibility. Notifications advise team members when and what action is required, the status of that action and provide evidence of completion.

Key Benefits of Real-Time Documentation:

- **Ease of Use.** Field Safe is so easy to use, it doesn't require a manual. Ease of use means forms are completed faster and with less errors, reducing administrative costs and keeping teams focused on core responsibilities. Self-populating forms, speech recognition texting, drop-down enabled, and smart memory make collecting field data simple.
- **Incident Prevention.** Digitizing forms completion allows head office to analyze data in real-time, spotting trends and taking preventive actions that can reduce incidents. Studies show that incident penalties cost app. \$17,658 each in direct costs and 4 - 6 times that in indirect costs. (Source: <https://www.osha.gov/penalties/>)
- **Data Efficiency Gains.** Digital processes increase the field data collected by as much as 20x and decrease time spent completing forms by as much as 66%!
- **Knowledge Sharing.** Information is available to, and communicated with, workers “just in time” ensuring they have the knowledge they need to perform tasks safely and nimbly adapt to changing conditions.
- **Regulatory Compliance.** Instant access to regularly updated safety manuals combined with real-time field data helps protect against fines from non-compliance, safeguards the company's reputation and ensures you can continue to conduct your day-to-day operations.

“Our system is so easy to use, we ship without a manual!”

Cam Barrett, CEO of Field Safe Solutions

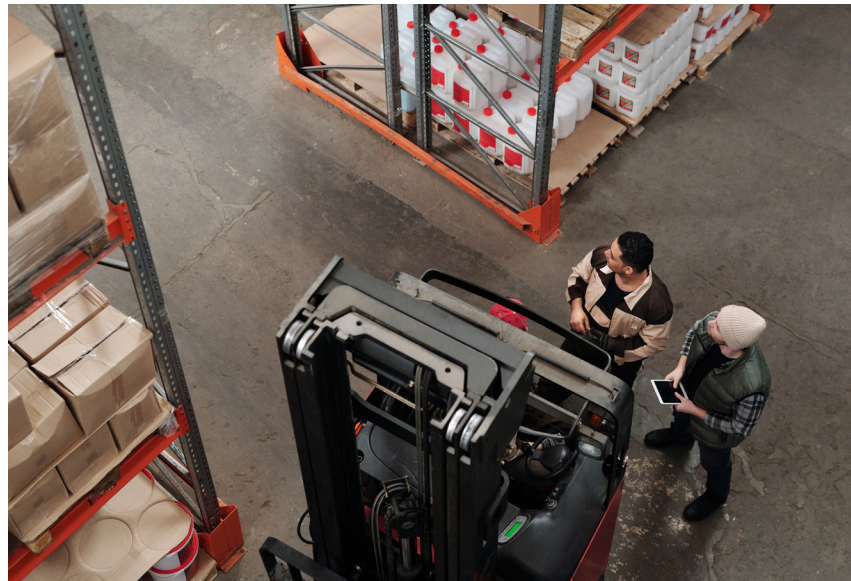

Field Safe's easy-to-use safety application is customizable to meet your unique needs.

Field Safe helps you construct a complete, all in one, health and safety system that facilitates real-time communication with workers, monitors journey management, tracks tickets and tasks, digitizes forms completion and data capture, ensures regulatory compliance and improves corporate decision making. However, our solutions are also modular, with each capable of operating on its own. License only what you require now and add additional functionality as your safety culture and business needs dictate.

Field Safe integrates into any software platform and runs on Apple, Android and Windows operating systems from any smartphone or tablet. In the most remote areas and extreme environments we keep workers connected by tapping into cellular services through satellite-enabled devices.

Our partnership with STARS and other North American emergency services providers initiates active monitoring of your team members. If a check-in is missed, pre-determined automated call responses are initiated. Workers know that in the event of an incident, help will soon be on the way.

Field Safe has a number of solutions designed to keep workers connected and safe, while improving your operations and lowering costs. **Learn more by visiting our website or call us at 1-800-497-7614.**

“Digitization of our existing forms has reduced the time to complete by over 2/3rds. We expect this single form will save over 1100 man-hours per year. As well, the data is available real-time for better decision making and further operational efficiencies.”

Global Director HSE, Multi-national Drilling & Well Services Company

About Us

Field Safe Solutions is a cloud-based software as a service company based in Calgary, Alberta. Our easy-to-use solutions digitize the field, giving our clients real-time data and the peace of mind that their employees are accounted for at any time, anywhere in the world.
