

Pandemic Safety and Return to Work Support

Whether they are working from home, the office, at site, or in transit, instant awareness of your team members' location, health and safety status, and fitness for duty has never been more important.

During these challenging times, businesses have had to establish dramatically different work structures and environments to ensure worker safety and mitigate risk cost-effectively. Self-isolation and social distancing have increased the need for digital collaboration and communication between all team members (including those returning to work as well as essential workers who never left) any time, anywhere.

Field Safe's solutions help our clients realize corporate efficiencies and cost savings while reducing risks and improving the health and safety of their team members.

- Digitizing field data collection maintains social distancing by eliminating the need to physically complete and deliver forms.
- GIS-based dashboards provide real-time visualization of worker location and support your contact tracing programs.
- Instant communication allows you to track, monitor and assess compliance with Return to Work best practices, self-isolation, and quarantine measures.
- Immediate understanding of worker location and status combined with digital forms including COVID-19 questionnaires simplifies workforce planning and ensures you can react quickly to changes and continue to meet business commitments.

"Digitization of our existing forms has reduced the time to complete by over 2/3rds. We expect a single form will save over 1100 man-hours per year. As well, the data is available real-time which gives us better decision making and other operational efficiencies."

Global Director HSE, multi-national drilling and well services company.

“
Lower operating costs, mitigate risks and improve worker health and safety by digitizing field data collection and communication
”

"COVID-19 continues to impact everything we do. Now more than ever, worker health and safety is your highest priority, as it is for us at Field Safe."

Cam Barrett, CEO of Field Safe Solutions

Reduce risks and lower costs while ensuring the safest work environment for your staff, contractors and visitors.

Field Safe helps you construct a complete, all in one, health and safety system that facilitates real-time communication with workers, monitors journey management, tracks tickets and tasks, digitizes forms completion and data capture, ensures regulatory compliance and improves corporate decision making. However, our solutions are also modular, with each capable of operating on its own. License only what you require now and add additional functionality as your safety culture and business needs dictate.

Field Safe integrates into any software platform and runs on Apple, Android and Windows operating systems from any smartphone or tablet. In the most remote areas and extreme environments we keep workers connected by tapping into cellular services through satellite-enabled devices.

Our partnership with STARS and other North American emergency services providers initiates active monitoring of your team members. If a check-in is missed, pre-determined automated call responses are activated. Workers know that in the event of an incident, help will soon be on the way.

Field Safe has a number of solutions designed to keep workers connected and safe, while optimizing your operations and lowering costs. **Learn more by visiting our website or call us at 1-800-497-7614.**

- 

Lone Worker Monitoring – With Field Safe, your workers are never truly alone. Know where your people are; understand what they are working on; keep them safe and connected.
- 

Real-Time Documentation – Easy data capture from any mobile device drives user adoption, faster completion of forms, and results in more accurate data being collected.
- 

Journey Management – Assess and track your workers' journeys to identify the level of risk, mitigate potential in-transit threats, and quickly respond to incidents.
- 

Safety Ticket Management – Manage and understand the status of your workers' certifications and training. Set up reminders to ensure their expertise is current.
- 

Task Completion Workflow – Assign tasks, monitor progress, and see overdue items in real-time.
