

## Smarter Safety Application Workflows

**Smarter workflows reduce the touch points that slow down the transfer of information. They ensure actions are responded to more quickly and less expensively.**

How smart are your current safety workflows? Does it take multiple touchpoints and too much time to resolve even the simplest of incidents?

Field Safe's safety application creates smarter workflows that minimize the steps necessary to record an event, provide notification to the responsible people based on the event's nature and pre-defined business rules, determine the actions required, and assign those actions to the accountable person(s), all while providing visibility to completion status throughout the entire process. Improvements include:

- **Forms consolidation.** For one client, new workflows led to a reduction in required forms by almost half.
- **Faster forms completion.** Another cites a savings of over 1100 completion hours per year for each of its 31 forms.
- **Data-driven scheduling.** Another client has reduced revenue leakage by introducing new (smarter) workflows that allow it to digitally understand well production and deploy maintenance teams more optimally.

“  
**What really puts the “smart” in smarter workflows is the ability to configure them based on incident type, severity and priority, and automatically communicate pre-defined actions only to the accountable person(s).**  
”

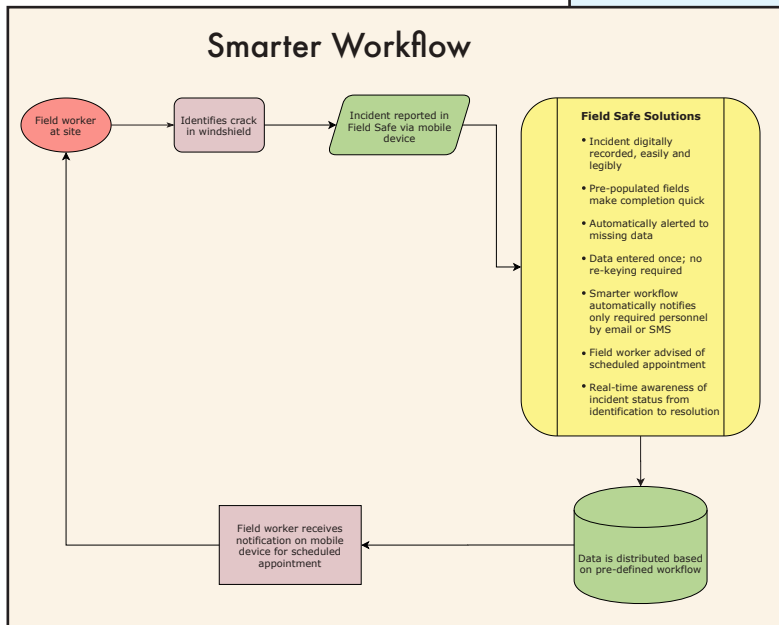

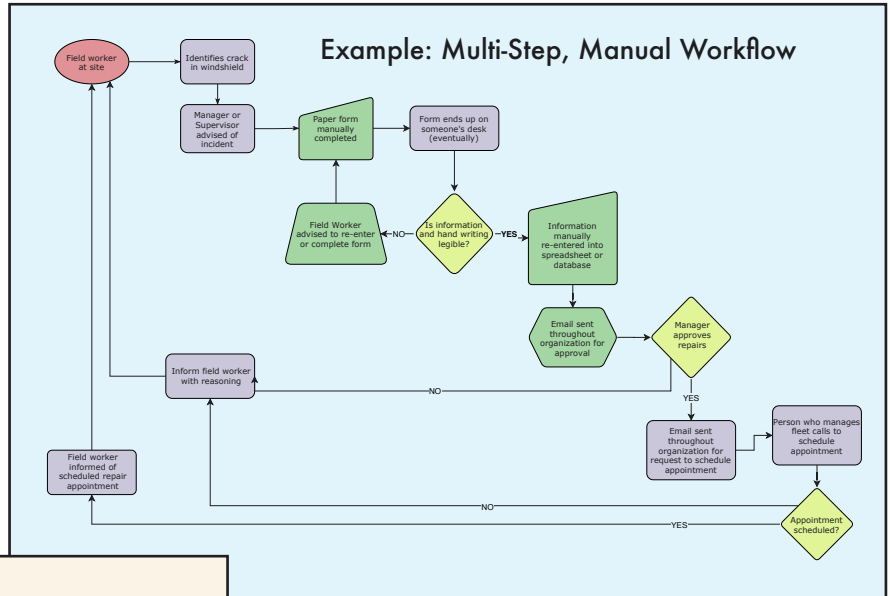

“Our system is so easy to use, we ship without a manual!”

Cam Barrett, CEO of Field Safe Solutions

**Technology and smarter workflows reduce the steps required to resolve an incident, resulting in fewer data entry errors, faster resolution and lower costs.**

Smarter workflows minimize the steps necessary to record an event, provide notification to the responsible people based on the event’s nature and pre-defined business rules, determine the actions required, and assign those actions to the accountable person(s), all while providing visibility to completion status throughout the entire process.

Field Safe has a number of solutions designed to keep workers connected and safe, while optimizing your operations and lowering costs. **Learn more by visiting our website or call us at 1-800-497-7614.**

**About Us**

Founded in 2014, Field Safe Solutions is a cloud-based software as a service company head-officed in Calgary, Alberta. Our easy-to-use digital safety application and its smarter workflows methodology connect all workers, providing our clients with real-time communication and data capture and the peace of mind that their people are accounted for at any time, anywhere in the world.

**Corporate Head Office:**  
Suite 1350, 707 7th Avenue SW  
Calgary, AB T2P 3H6
