

Land Services Worker Safety & Data Capture Solutions

Easy-to-Use. Safety Focused. All-in-One.

Land Services professionals perform a variety of tasks, often alone in remote and geographically challenging terrains. Field Safe's easy-to-use health and safety platform makes it simple to transfer data from the field and stay connected with employees and contractors in real-time.

Protect your workers on the journey to site and throughout their day and make sure they return home safe and sound.

"We had looked for many years for a complete solution that could handle our business needs. Field Safe Solutions was the first that provided the complete end-to-end solution and is also easy to use for our staff. We now have real-time access to information and have more data being submitted, all resulting in better decision-making capability." - Senior Partner, Land and Environmental Consulting Company

Connecting your workforce with our easy-to-use safety application improves **communication** and **safety**, creates **efficiencies**, mitigates **risks**, and **lowers operating costs**.

INDUSTRY IMPACT

THE CHALLENGE:

Our client's landmen, surveyors, and other remote-based workers were not effectively collecting and submitting field data. Current processes involved multiple, difficult to use systems and in some cases, they were still manually completing forms using pen and paper. Most importantly, worker safety was compromised because it was impossible to connect in real-time.

FIELD SAFE'S SOLUTION:

Field Safe built an all-in-one, end-to-end solution that made it easy for workers to complete and submit data in real-time and stay connected with other team members. We digitized the entire safety platform, including 29 field forms and created custom operational information. Manual processes were eliminated, and workflows streamlined, which reduced costly extra steps. Instant communication between the field and head-office was established.

THE RESULTS:

Users adopted the solution fast due to its ease of use and accessibility from smart devices. Real-time access to complete, accurate field information is creating operational efficiencies through improved decision-making. Eliminating manual processes immediately lowered administrative data-entry costs. And, instant communication makes it easier to protect at-risk workers and redirect them to other projects when required.

FIELD SAFE
SOLUTIONS

Safety First

- ✓ Know where your people are and communicate with them at any time, anywhere in the world.
- ✓ Real-time awareness of potential hazards means you can correct and protect your people fast.
- ✓ Visibility to the complete life cycle of an incident helps minimize and mitigate future occurrences.
- ✓ Field Safe integrates with emergency service providers to provide active monitoring of users. Workers know that in the event of an incident, help will soon be on the way.

About Us

Field Safe's easy-to-use health and safety solution and smarter workflows methodology connect workers and help our clients save time, save money, and save lives. We do this by simplifying the sharing of field data and facilitating real-time communication among workers and management at any time, anywhere in the world.
