

# Electric Utility Field Worker Safety & Data Capture Solutions

Easy-to-Use. Safety Focused. All-in-One.

From generation to transmission to distribution, there is a reason why electric utility companies look to Field Safe to protect their lone and other at-risk workers. Field Safe is the only solution that creates a complete, all-in-one health and safety program. Field Safe eliminates the need for multiple solutions or manual processes and reduces the "app fatigue" multiple systems create.

Field Safe is the industry's easiest-to-use health and safety platform. We keep you connected to your workers in real-time. We do this by simplifying the transfer of data between the field and office using the phones and tablets that are part of everyone's day.

Field Safe helps make sure your people return home safe and sound at the end of each shift.

## INDUSTRY IMPACT

### THE CHALLENGE:

Electric utility sites are often in remote areas that require long and risky commutes. Or, sites might be nearby but involve dangerous activities like isolating substations. Workers may have to climb towers, set up grounds, operate heavy equipment, and deal with (sometimes) unfriendly landowners or even wildlife.

### FIELD SAFE'S SOLUTION:

Field Safe makes it easy to stay connected to workers anywhere, including in transit. Digitizing the field eliminates paper processes and simplifies data sharing using your cell phone or tablet. Completing Field Level Assessments and getting sign-offs is fast and simple. Your workers are connected immediately to head office, other team members, and even emergency personnel if needed. They quickly receive approvals required from supervisors so that they can get back to business. And they are safer. Field Safe tracks each individual's training and accreditation details to ensure they have the necessary certifications to perform specific duties safely.

### THE RESULTS:

Real-time access to complete, accurate field information creates operational efficiencies like improved equipment maintenance, smarter workflows to eliminate costly extra steps, and faster awareness of potential hazards. As a result, ravel risks decrease and so do incidents stemming from lack of training. And time on tools rises thanks to less time spent completing forms manually. Most importantly, Field Safe makes the utility worker's day less risky.

## Safety First

- ✓ Know where your people are and communicate with them at any time, anywhere in the world.
- ✓ Real-time awareness of potential hazards means you can correct and protect your people fast.
- ✓ Field Safe integrates with emergency service providers to provide active monitoring of users. Workers know that in the event of an incident, help will soon be on the way.

## About Us

Field Safe's easy-to-use health and safety solution and smarter workflows methodology connect workers and help our clients save time, save money, and save lives. We do this by simplifying the sharing of field data and facilitating real-time communication among workers and management at any time, anywhere in the world.

*Field Safe's digital solution simplifies the checks and balances required to take a distribution substation **offline**. Workers are safer and work is completed faster.*

## Additional Benefits

### Lower Your Operating Costs.

Eliminate the need to rekey data, reduce paper consumption, and lower insurance premiums, and other expenses.

### Operate by Priority.

Maximize your revenues by scheduling projects and maintenance based on level of need.

### Win More Business.

A digital safety solution helps prove you are a safety-conscious vendor.

### Meet Environmental Mandates.

Safe trees and lower CO2 emissions and lighten your carbon footprint.

### Maintain Security Compliance.

Our SOC 2 compliance certification means we meet the highest industry standards for data security.
