

Forestry Sector Worker Safety & Data Capture Solutions

Easy-to-Use. Safety Focused. All-in-One.

Planting trees, climbing trees, operating equipment, watching for wild animals and falling trees or branches; it's all part of a typical day for workers in the forestry sector. Factor in remote locations and traveling to site on minimally maintained, rough roads and you've got a recipe for high-risk conditions.

Field Safe's easy-to-use health and safety platform makes it easy to stay connected with your at-risk workers in real-time. We do this by making it easy to transfer data between field and office using the phones and tablets that are part of their day.

Field Safe helps make sure your people return home safe and sound at the end of their shift.

"We had looked for many years for a complete solution that could handle our business needs. Field Safe Solutions was the first that provided the complete end-to-end solution and is also easy to use for our staff. We now have real-time access to information and have more data being submitted, all resulting in better decision-making capability." - Senior Partner, Land and Environmental Consulting Company

Connecting your workforce with our easy-to-use safety application improves **communication** and **safety**, creates **efficiencies**, mitigates **risks**, and **lowers operating costs**.

INDUSTRY IMPACT

THE CHALLENGE:

Our client had workers operating heavy equipment at multiple locations. They had no way of collecting data from each site regarding the condition of equipment. They had a maintenance schedule that was driven by "date last visited" versus need. More importantly, they couldn't immediately connect with their workers to share intel like changing weather or poor road conditions. This compromised worker safety.

FIELD SAFE'S SOLUTION:

Field Safe provided a digital solution that was easy for workers to access and use from their cell phones and tablets. Specialized forms and workflows were created to capture and share specific equipment performance details. We made it easy for workers to complete and submit data in real-time and stay connected with other team members. And instant communication between the field and head-office was established, making the journey to and from site safer.

THE RESULTS:

Workers adopted the solution fast due to its ease of use and accessibility from smart devices. Real-time access to complete, accurate field information is creating operational efficiencies through improved equipment maintenance scheduling. Operating costs have decreased. Travel time to / from sites where maintenance was not necessary was eliminated and time on tools has increased due to less equipment down time.

Safety First

- ✓ Know where your people are and communicate with them at any time, anywhere in the world.
- ✓ Real-time awareness of potential hazards means you can correct and protect your people fast.
- ✓ Visibility to the complete life cycle of an incident helps minimize and mitigate future occurrences.
- ✓ Field Safe integrates with emergency service providers to provide active monitoring of users. Workers know that in the event of an incident, help will soon be on the way.

About Us

Field Safe's easy-to-use health and safety solution and smarter workflows methodology connect workers and help our clients save time, save money, and save lives. We do this by simplifying the sharing of field data and facilitating real-time communication among workers and management at any time, anywhere in the world.

Additional Benefits

Lower Your Operating Costs.

Eliminate the need to rekey data, reduce paper consumption, and lower insurance premiums, and other expenses.

Operate by Priority.

Maximize your revenues by scheduling projects and maintenance based on level of need.

Win More Business.

A digital safety solution helps prove you are a safety-conscious vendor.

Meet Environmental Mandates.

Lower CO2 emissions and lighten your carbon footprint.

Maintain Security Compliance.

Our SOC 2 compliance certification means we meet the highest industry standards for data security.
